

**Word
Problem
Key Words
Activity**

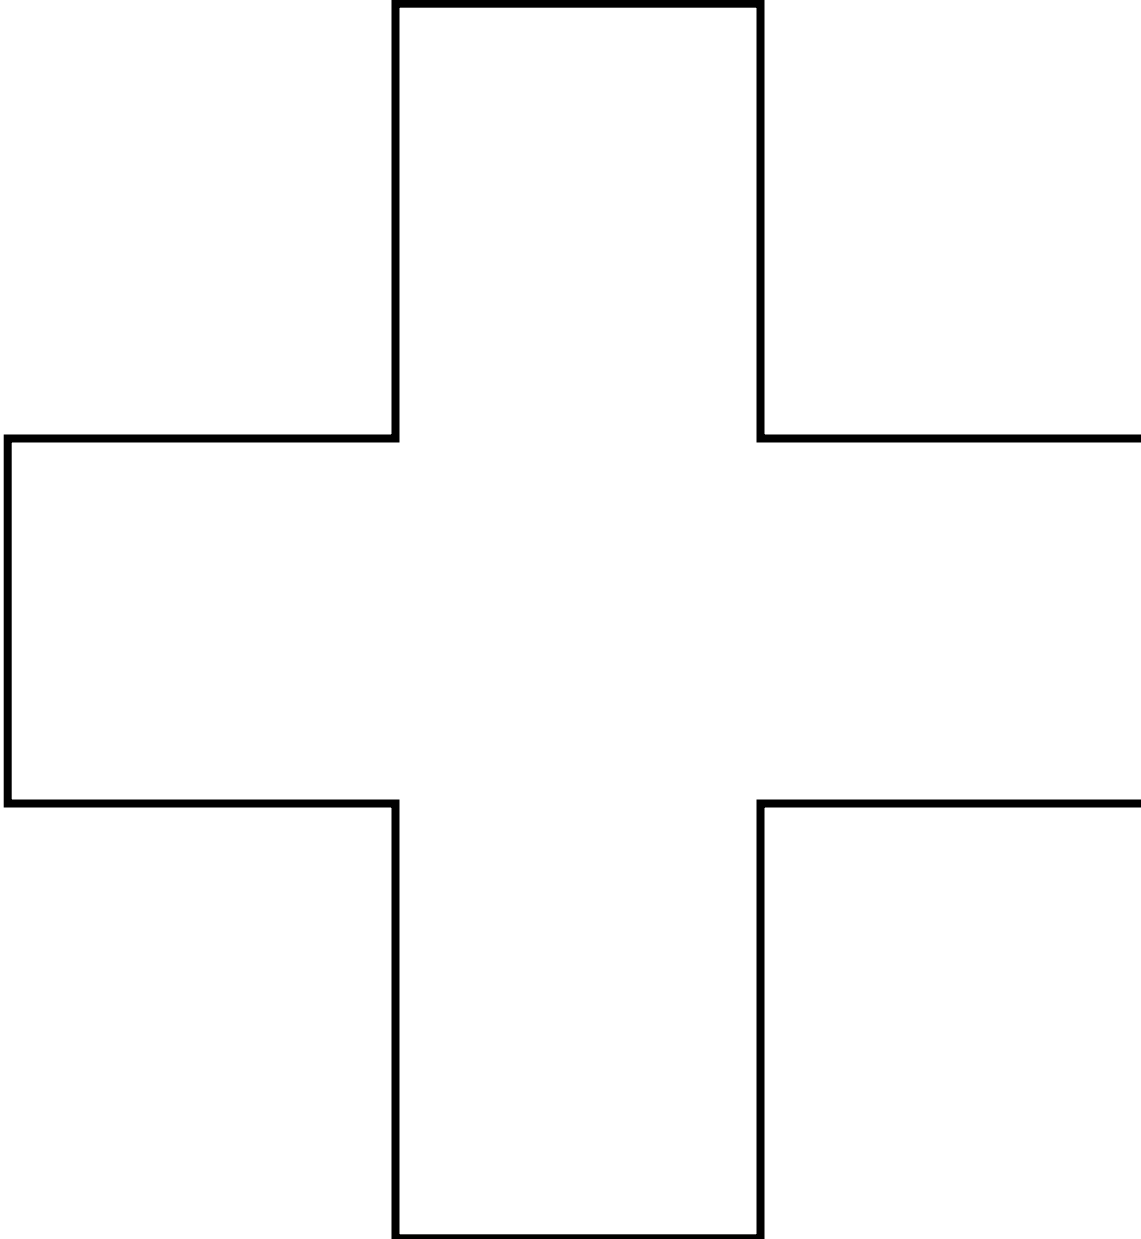

This lesson can be used as a center activity, group activity, or you could have them glue it into their math journals. I usually have them glue it in their journals, so they will have it to refer to later.

Thank you so much for downloading this freebie! Please take the time to rate and leave some feedback. I really appreciate it!

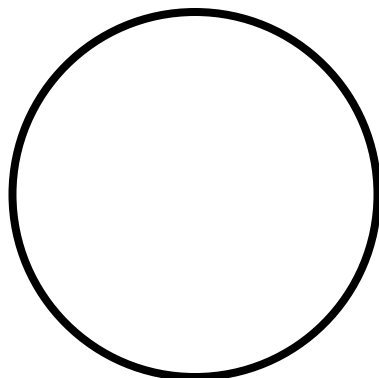

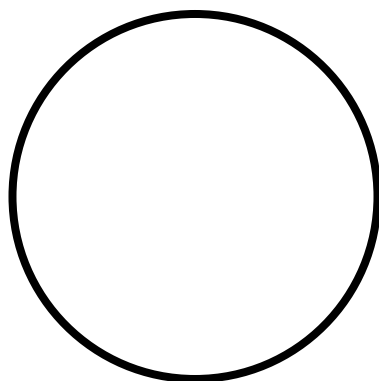

This lesson will help your students learn the key words to look for when solving word problems.

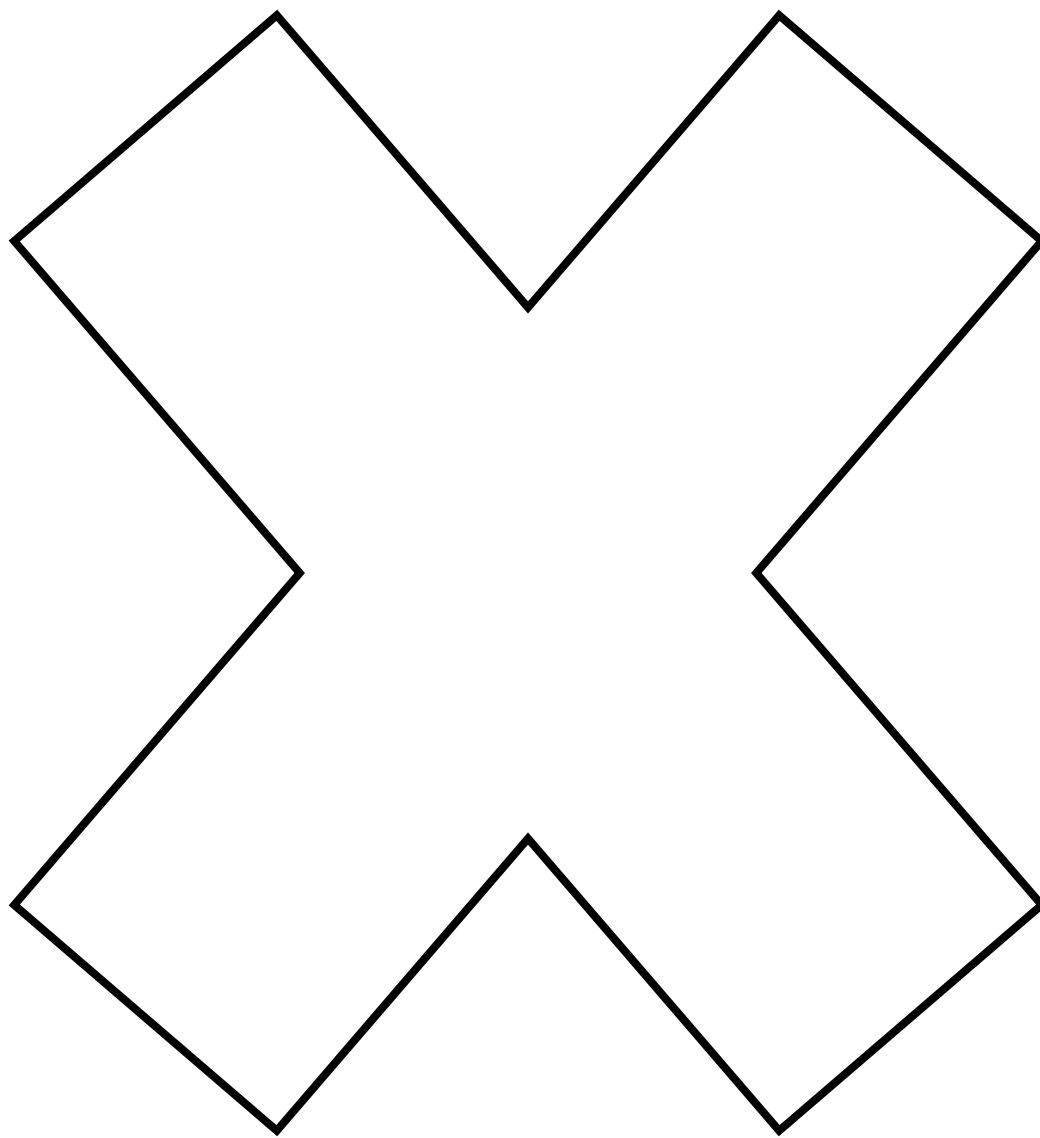

Directions:

1. Copy operation signs on construction paper, using a different color for each sign.
2. Copy the list of key words.
3. Students should cut out each word or phrase and glue to the appropriate operation sign.

Cut apart each word and glue it on the operation sign that it refers to .

How many more?	double	total	split	product	have left	less than
difference	all together	both	same	twice	as much	each group
sum	minus	times	evenly	decrease	equal parts	share equally
fewer	divided by	faster	each	increase	How many in all?	triple
in all	remains	plus	quotient	take away	goes into	have left
